Subject: Upstream samples for PBDE analysis

Bob

This is to follow-up on our discussion at the last Project Managers meeting regarding upstream sediment samples for PBDE analysis. EPA is requesting the following samples:

UG-02B located just upstream of Sellwood Bridge
UG-06B located just upstream of Johnson Creek
UG-12B located just downstream of Cedar Island

Please add these archived samples to the list of 97 samples that EPA requested in our December 23, 2009 letter to the LWG. Let us know if you have any question regarding these samples or shipment to our Regional Laboratory in Manchester, Washington.

thanks
Chip
